

I am a long time subscriber to XM Radio, and a long time sufferer with the pathetically low-quality product that has been offered on our public airwaves over the last few years. Rather than improve their product, over-the-air broadcasters want to stomp on XM. Don't let them do it. It flies in the face of the 1st Amendment, and I will not stand for it.

Leave XM alone, or its 1 million plus subscribers will make ourselves heard at the ballot box.
